Dekart is a leader in disk encryption for computers and desktops. dekart private disk 2.10 full 26 Dec 8, 2010 Dekart Private Disk is an easy to use, powerful and useful disk encryption utility that lets you to transparently encrypt proprietary data. Private Disk is a disk encryption application for the Microsoft Windows operating system, developed by Dekart SRL. It works by creating a virtual drive, "C:\Private Disk". It protects your data even if your computer or hard disk is stolen or lost. Dekart Private Disk is a useful tool for encrypting all types of storage including USB disks, external hard drives, and network shares. It uses AES encryption and support for strong asymmetric security technologies such as Diffie-Hellman key exchange. Once the program detects changes to the hard drive, all stored data is re-encrypted. In addition, the program maintains a secure database of stored encryption information. Dekart Private Disk is particularly useful for protecting data on USB or external hard drive media. The 570a42141b
