**Although an Attribute Point system is often, and quite correctly, mentioned as an optional optional optional system, it's present in every edition. This system allows you to track and balance your character's strengths and weaknesses, which makes each character's growth and development much more precisely controlled. For example, a Fighter could have points in his attributes of Strength, Dexterity, Reflex, Will, or Intelligence, and could allocate them between them as he wishes, often disregarding the principle of "divide and conquer," since a fighter doesn't have to allocate all points to a single attribute or to beat a monster in order for the fight to be seen as a victory. An idealist can often be chased down by a red-hot poker with good reflexes and initiative, but not necessarily enough Strength and Will to survive. In contrast, a lazy goblin whose only contribution to combat is to be entirely passive can be utterly defeated by a Ranger with enough Dexterity and Reflex to focus her efforts on them.**

**Fugue is a game which is especially suited to this system and even more so if, as in our Pathfinder campaign, you are using**
