It's a pirate game! You're going to be getting into boats. You're going to be fighting. You're going to be stealing. You're going to be killing. You're going to be filling your pockets with riches. You're going to be fearing the sound of the drum and the cry of the lookout. You're going to be hacking and slashing your opponents to pieces. You're going to be hitting your opponent with both barrels. You're going to be saying "admirable!". You're going to be saying "easy money". You're going to be saying "pick on this one, they're weakest". You're going to be saying "easy pickings". You're going to be saying "dead men tell no tales". You're going to be saying "I have my own ship". You're going to be saying "I'm one of them!". You're going to be saying "There's no depth there! I'm going to sail around!" You're going to be saying "pick a side" You're going to be saying "I wish that I was back in port". You're going to be saying "why have they cut that character out?" You're going to be saying "I don't know, just pick a side!" You're going to be saying "just choose a side!". You're going to be saying "I don't care". You're going to be saying "don't you have something to do?". You're going to be saying "I can do whatever I like". You're going to be saying "I'm up to no good" You're going to be saying "I have no friends". You're going to be saying "it's just you and me". You're going to be saying "I'm going to kill you". You're going to be saying "I'll kill you all". You're going to be saying "I can kill you". You're going to be saying "no one cares about you anyway". You're going to be saying "I'm the best". You're going to be saying "I'm the finest in this game". You're going to be saying "kill 'em all and let God sort 'em out". You're going to be saying "get back in line" You're going to be saying "I'll kill you!" You're going

## **Features Key:**

- Start of adventure into the Galactic Saloon deep under the planet Zorya. Looking for the hidden treasure, but few people with him, and also in need help can you help?
- This is a VR game that fuses the possibilities of **Unity 3D**, also featuring a minimalist art style. You can make small movements, look around, watch any virtual world. In **Saloon VR** we added more than 60 seconds of the VR gameplay, increasing the possibilities and fun. We also added an additional view in the first loading screen where you can see almost a game menu that will let you start the game. Here you can clearly see the positions of the other players and you can play together, but also be alone, if you want to do.
- Also, in the shop you can buy upgrades and new suits. All of them, also available in the game via the equipment of the player, give various gameplay advantages, like speeders, lasers or shields. However, there can only be one of each.

The world of The Cathedral is a mysterious place. A seven-year-old boy wanders the vast cathedral, no longer... About This Game: The world of The Cathedral is a mysterious place. A seven-year-old boy wanders the vast cathedral, no longer certain what he is searching for. The path before him is a maze of pillars and crypts, of magical statues and echo-y voice-boxes. As he moves through the past, can he really hope to find peace within the cathedral? © 1999 King Mausoleum (King Mausoleum, Inc. All Rights Reserved). "The Cathedral: Allison's Diary" is a VR horror game inspired by John Lasseter's "So Long, and Thanks for All the Fish" (1997) for the Sega Dreamcast. On the suggestion of the young author 'Isaac Allison', who inherited a diary from his friend Allison, the 'cathedral' of the title is to be recognized as the original author's home, as she made the sound in the game. Due to the ease of porting old-school PC games to VR, it is easy to imagine a modern release of this game. However, I'm not sure it would have held up to the nostalgic experience of playing the game in VR. The impact of the kitschy style of the game's presentation would have been lost, as it might be made less obvious that the 7-year-old is just a simulated character. On the other hand, the sound of the cathedral in the home would be more appropriate, as this was always intended to be a VR game. There were many different ways that the game could have been played within the context of a VR game. One could have had an on-rails sense of movement, with the only interaction being a turning of head to look around the world. Another could have been a third-person experience, where one's head was free to turn, while the player's body stayed still. Another could have been a first-person experience, where the player moved around the world, but only seeing their hands and feet in real life. I would have preferred an on-rails experience, as that is what I had experienced in other "walking simulators" that I had reviewed. However, I can't say c9d1549cdd

"Would you rather start dating John Quincy Adams or start dating Napoleon Bonaparte?"<sup>1</sup>

1. Field of the Invention The present invention relates to a solid-state imaging device which has a photodiode structure and a charge transfer method.

2. Description of the Related Art As a solid-state imaging device which performs reading out of a signal charge by means of a charge transfer method, there is known a solid-state imaging device in which the solid-state imaging device is a CCD (Charge Coupled Device) or the like. In the solid-state imaging device, a plurality of photodiodes are arranged in a vertical direction and a horizontal direction to configure a pixel. Each photodiode is formed, for example, in a diffusion layer of a semiconductor substrate, and is connected to a corresponding MOS transistor. The photodiode has a p+ region, an n- region, and a depletion layer which is a boundary between the p+ region and the n- region. The photodiode further has a counter electrode and a transfer gate electrode which are formed on the n- region, and is covered with a light-shielding film which is made of aluminum, a chromium layer or the like. The light-shielding film, the counter electrode, and the transfer gate electrode are formed on the photodiode through a first interlayer insulating film, and are connected to a source/drain region of the MOS transistor through a second interlayer insulating film which is formed of, for example, a silicon oxide film. A portion of the n- region which is located between the counter electrode and the transfer gate electrode is a potential barrier portion. When a signal charge is read out from the photodiode, the charge is transferred from the photodiode to the transfer gate electrode in a first phase, the signal charge is stored in the transfer gate electrode in a second phase, and the signal charge is transferred from the transfer gate electrode to a floating diffusion region in a third phase. The transfer gate electrode is driven by a transfer gate pulse which is applied to a corresponding gate electrode of the MOS transistor in a control period. In a fourth phase, the signal charge stored in the transfer gate electrode is transferred to the floating diffusion region by a drive pulse which is applied to the source/drain region of the MOS transistor. The potential of the floating diffusion region is sensed by a signal readout circuit which is connected to the source/drain region

Spotlight: Getting Started with Vizio's Roku Streaming  
Media Player Roku periodically releases add-ons for its  
Roku streaming media players. I purchased most of them,  
and often use them as a test bench. This time around my  
testing includes streaming videos from Roku, but also  
hundreds of cloud-based, large-file storage outlets to  
demonstrate that storage is no longer a limitation for the  
device. [Related: Roku streaming media player review]  
Owning the Roku player is like owning a media device in  
every home: You really don't need to think about it and  
can use it without tons of thought. I had high hopes for  
Vizio's Roku player when I first saw it in early 2011 at CES.  
I use a slew of video streams -- large-file, high-quality  
streaming sources -- in my daily life, and wanted a way to  
tap into all those sources without hopping on the web and  
going through dozens of steps to "find" the different  
accounts. A year and a half later, I think the Vizio Roku  
player is still the best option in its class. It offers the best  
picture quality I've seen in a streaming media device (in  
my humble testing), excellent selection of add-ons,**
