BuriedTown Features Key:

18 hand-drawn maps from the book
15 mini-campaigns (boss encounters) with a solo player mode
5 mini-campaigns (boss encounters)
2 solo player mode scenarios

Mini-Campaigns and Ongoing Campaigns

There are several different mini-campaigns and ongoing campaigns you can play in which will take you through several goals (sets of instances) to reach an overall conclusion. Some are as an ongoing campaign with a solo player, while others are mission-based, which can be each used as a mini-campaign. These are also optional. You can find descriptions for those below: **Scenario 1 - Monkey Business** The first mini-campaign that takes place in the city of Lankhmar. **Scenario 2 - The Company Way** The second mini-campaign the takes place in the city of Regoan. **Mini-campaign 3 - New Leaf** The third mini-campaign takes you to the city of Kaleman. This is the main ongoing campaign that takes place in Gandia.

Solo Player Mode

Solo player mode in the main ongoing campaign (number 3) will be self-contained and add another dimension to the adventures. The solo player has a full party with all its stats set to default. You will be switched around from one instance to another, which will give you a new goal but will also provide new adventures to solve.

Solo Player Scenarios

These last few scenarios can be played independently from the larger campaign. The characters will still change scenes, but these are more dynamic and are not open-ended. You can play a solo player only scenario as a game of averages: his or her skills will be displayed automatically by the system; as soon as the character dies, this average will be calculated out.

Description: A visually stunning stealth/action game set in a post-apocalyptic Russian steppe landscape. Explore huge and unique environments, hide in and explore the landscape, even jump on horses to reach distant places. One of the most immersive games out there. A world torn apart by war, disease, famine, and plague. Little more than the remnants of a war-ravaged Europe. A landscape littered with the broken bodies of the few survivors. A world peopled by the infected and the dying. DesignerGaming: Igor Spassky, the director of the game and renowned Russian game designer, had been creating his AI-puzzle game in a virtual machine, and had an epiphany. He quit his job, and quit his apartment. He moved into a 3-room dorm room, and started working on the game full time. The game has been in development for four years, and has been a labor of love for Spassky. Gameplay: This atmospheric stealth/action game is set in a realistic environment. To complete the game, you need to explore, stealthily and efficiently, plan your actions and approach them well, perform actions, hide in the shadows, avoid enemies and use the environment as a weapon. You're not playing for points, you are playing against the clock to survive and succeed. Plot: Over 4 years passed since the war. The last battle. The last day. Mankind destroyed. You are Nikolai, a scout sent to recon the remaining pockets of the infected around the world, to find the missing survivors. The system is up and running: every few days, AI stations broadcast the data they collect and the "Reapers" go to reclaim what they can. You are one of the last few survivors, and you have just been assigned to a remote outpost far out in the steppe. The system doesn't expect you there. It doesn't expect you alive.1. Field of the Invention The present invention relates to a storage controller, a storage system and a method of managing data. 2. This game is intended for 3rd to 5th Gen. consoles. However, due to its highly experimental nature, it does not require a specific model of system. The game will run at a low quality setting on older systems; we recommend running at the highest setting available on a more modern system if playing on a console. Table of Contents Support The Mario Maker support team is working on a series of updates to the game. If you'd like to stay informed of what's being worked on, or for any other updates,
