present invention relates to a device for the distribution of deionized water from a spray system and particularly to a device to limit water consumption while modifying the existing spray system without effecting an immediate change in the distribution system. More particularly, the present invention is directed to a head deionized water dispensers that allows one to change existing head without effecting a change in the distribution system. Water dispensers have been used for many years in connection with commercial and household applications. Such commonly used dispensers must periodically refill to remain in operation. Furthermore, it has been a common practice to provide a large reservoir

Although such reservoir may be adequate for a period of time under normal conditions, in tropical and other climates, a large storage volume of water is entirely unnecessary and ineffective in response to the immediate needs of the user. These meals can pretty much be like a picnic if you eat them at home. What's great about IBBFF is they use locally sourced ingredients. What I like most about IBBFF is they have a glassware and tableware matching their theme decor. * Links that take you outside the site are automatically identified by our spider software and highlighted in your current browser window.
