It can be used to block internal devices, such as printers, and can block external devices, such as USB pen drives. Features: Can block external devices Can block internal devices Works with white lists Reports tool Command line interface Can select single device to block Can locate blocked device Can create scheduled tasks Screenshot: DEKSI USB Security download

---

page at Download.com DEKSI USB Security review – Can Block external devices at PC – PCs Hardware P.S.: The program is free to use, but they do not include manual usage of the software. It is worth noting that there is no real tutorial in the main interface and the only way to get any important info is to run the application, check the results and then go to the System Manager. The program is not a lot better than the generic drivers for USB ports that are already available. DEKSI USB Security is a USB security software that allows you to enable ports to block external devices without having to go through the configuration process. It can be used to block internal devices, such as printers, and can block external devices, such as USB pen drives. DEKSI USB Security features: Able to block external devices Can block internal devices Works with white lists Reports tool Command line interface Can select single device to block Can locate blocked device Can create scheduled tasks DEKSI USB Security includes a pretty simple GUI for

---

managing the remote clients. It is easy to set up and make adjustments to your white lists.

You have the options to activate and deactivate the password protection mode, to create scheduled tasks to activate the change of permissions, to create a report and to export the report in the form of a report file. The other settings are not as easy to manage as they should be. The functions, on the other hand, are easy to understand and it is possible to block a single device, block multiple devices at the same time, unblock single devices or all the available ones. The program is able to track the added devices and their behavior, so it is possible to see who access the clients in a predetermined time. DEKSI USB Security is the kind of software that can block almost anything a normal user could want, but it is

### **DEKSI USB Security**

DEKSI USB Security allows you to easily create black lists and white lists of devices

---

that can be connected to a specific Windows computer. All the devices connected to the computer are displayed in the DEKSI Security interface, with a set of permissions for them. Now the choice is in your hands: you can grant the required permissions to any devices that must connect, or you can block access to them. This tool takes care of all the details for you and you only have to enter the name of a computer and add the names or IPs of the devices that have to be connected to it. Any software fan can tell you that software development is an expensive process. You have to invest a lot of time, effort and money in developing, testing and finally shipping the software. It's a laborious and time-consuming process. E-commerce software developers all over the world are trying to simplify the task and make it as quick and easy as possible. They try to use the best tools available to them to streamline the whole process, as well as giving users as many useful features as possible. With that in mind, we have put

---

together a list of 10 best e-commerce software development tools, to make your life as an online entrepreneur easier. 1. PayPal Anywhere Let's start with the most common e-commerce tool on the market, PayPal. Since the online payment company's inception, it has changed the way we do business online. Paypal allows you to make a smooth transition from offline business to online one by allowing you to accept payments, with as many as 30 accounts per PayPal account. What sets PayPal apart from other e-commerce software development tools is the fact that PayPal isn't an online payment gateway or just a credit card processing company. It is also an e-commerce app, offering users a wide variety of templates, marketing tools and payment services. It's a tool meant for all. It has been popular among online retailers to avoid charging their customers' credit cards on purchases of only a few dollars. It has also become the preferred payment method to avoid hassles and fines for retailers that

---

accept payments by credit card. It is offered to businesses of all sizes. They can create an online store from scratch and pay directly through the PayPal account that they create for their business. But PayPal isn't only a good e-commerce tool – it is a good business tool. An online merchant can choose PayPal  3a67dffeec
